

SEALED LICENSE PLATE FRAME

Thank you for selecting this quality GRIOT'S product. The **SEALED LICENSE PLATE FRAME** is made from durable, UV protected polycarbonate, crystal-clear lens. A flexible rubber gasket fits snugly around the plate to prevent moisture and dirt from getting inside. Snap-in fastener covers conceal the screw heads and give a sleek finished look. Enjoy the best!

USEFUL INFORMATION

Remove the snap caps from the license plate frame by pushing them out from the backside of the mounting hole. The caps can also be removed from the front using a small standard screwdriver. Place the clear lens face down on a soft towel or cloth. Set the rubber gasket into place and insert the four spacers in to the mounting holes of the lens. Position the license plate frame face down on the gasket in the recessed area. Make certain the lip of the gasket fits over the edge of the license plate for a proper seal.

NOTE: When mounting your **SEALED LICENSE PLATE FRAME** with only two screws it is recommended that you secure the opposite end with the supplied hardware. Do not over tighten the mounting screws as this can cause damage to the lens and frame. Next position the assembly on the vehicle and secure with the appropriate mounting hardware. Finish the installation by firmly pressing the Snap Caps into place over the mounting screws.

DISCLAIMER

GRIOT'S GARAGE is not responsible for any misuse of the **SEALED LICENSE PLATE FRAME** for any injury or damage incurred to any person or object related to the **SEALED LICENSE PLATE FRAME**.
