USEFUL INFORMATION

Select the handle and cleaning head appropriate for the cleaning job. Use the ferrule connectors to attach multiple handles together for a longer reach. Place a Butt-End connector on the back side of the handle to prevent accidental damage to surrounding areas. Use with our **MICRO FIBER DETAILING SOCKS** (Item 10221) or wrap a clean cloth completely around the cleaning head. Apply the desired amount of cleaning product or dressing directly to the cloth. Use one hand to hold the cloth and the other hand to maneuver the **DETAILING STICK**. Finish by wiping the area with a dry section of cloth.

CAUTION:

Aggressive scrubbing can cause the cleaning head to wear through the cloth. This can cause damage to the surface being cleaned. If you see the cleaning head is starting to wear through the cloth stop and move the head to another section of cloth. Always inspect your cleaning cloth for holes and wear before every use. Handles are made from tempered aluminum and can be bent to meet your individual needs. Repeated bending can weaken the aluminum and will eventually cause it to break.

DISCLAIMER
