DIGITAL RACING TIRE GAUGE

Thank you for selecting this quality GRIOT'S product. Your **DIGITAL RACING TIRE GAUGE** has a large and easy to read backlit LCD display. The built-in valve allows you to bleed off excess air for correct pressure. The 0-60 PSI gauge works for cars and light trucks. Enjoy the best!

USEFUL INSTRUCTIONS
1. Press the "On" button to activate the gauge and scroll between the measurement units, PSI or BAR.
2. Attach the locking chuck firmly onto the tire valve stem, ensuring no air leakage. **(Picture A)** The exact air pressure value of your tire will be displayed.
3. After taking the pressure reading you may press the bleeder valve to lower the pressure **(Picture B)**. After bleeding, the exact air pressure value of your tire will be displayed.

REPLACING THE BATTERY
1. Using a small Phillips-head screwdriver remove the top screw from the small round plate located at the back of the gauge head and carefully remove the plate.
2. Remove the batteries from the battery holder making note of their position.
3. Install the new batteries into the battery holder.
4. Replace the back plate and secure with the Phillips-head screw.
